

DISHWASHERS

MAINTENANCE TIPS

Did you know that a slow leak may go undetected for years, leading to huge water damage claims? Many leaks are visible, but a good majority are hidden and you should take appropriate action to properly inspect. Water pooling, mold, mildew, and damage to neighbouring units are common results of leaking dishwashers.

TIPS TO HELP PREVENT DISHWASHER RELATED LOSSES:

- Visually inspect the rubber gasket around the inside edge of the door and replace if cracked or worn
- Use steel-braided supply hoses and inspect them often for damage
- Consider installing a water leak detection system for hard-to-reach areas: pumps, valves, etc.
- Only use detergents specifically formulated for dishwashers; avoid detergents that create suds
- Keep the drain basket clean

Always maintain insurance to protect yourself and your contents.
